studio

NMF RIVERSIDE SCHOOL

MBALE, EASTERN UGANDA

A collaboration conceived by charities Harpenden Spotlight on Africa, PEAS, the Nick Maughan Foundation and architecture practice CAUKIN Studio will see a 1,200 pupil secondary school and technology college designed and built in the Namatala region of Mbale District, Eastern Uganda.

NMF RIVERSIDE SCHOOL

Namatala, Mbale District, Eastern Uganda

Project Overview

Harpenden Spotlight on Africa, PEAS, the Nick Maughan Foundation and CAUKIN Studio have developed the design of the NMF Riverside School. The 7 acre site is located to the West of Mbale and borders the Manafwa River.

This project will create a secondary school campus large enough to educate up to 1,200 students and will be split across 3 phases which include multiple building functions and typologies. Currently, 2/3 children in Uganda do not continue through to secondary education, with poor access to schools and high fees prohibiting many from further education.

The new campus will feature multiple buildings that sit in harmony with the surrounding context, placing the new school at the heart of the Namatala informal settlement. Through strategic planning and careful consideration of lines of sight, entrances / circulation and linking of green spaces, the resultant design will create a cohesive environment for learning which will inspire students for generations to come.
